DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see p. 10-12, filed September 29, 2005, with respect to the Yagashita reference (USPN 6,815,279 B2) have been fully considered and are persuasive. The rejection of claims 5 and 18 has been withdrawn.
2. The applicant's arguments with regard to the difference between the Yagashita SiGe layer (12) and the applicant's claimed SiGe buffer layer have been found to be persuasive since it has been pointed out that lattice strain is absent from the upper portion of the claimed SiGe buffer layer.
3. The examiner notes the newly amended title and thus hereby withdraws the objection made to the specification in the previous Office action.

Allowable Subject Matter

4. Claims 2-12 and 14-18 are allowed.
5. The following is an examiner's statement of reasons for allowance: the examiner is unaware of any prior art which suggests or renders obvious a semiconductor device with a silicon germanium channel layer having a thickness of 2-6 nm which is formed on a silicon substrate such that the silicon germanium channel layer is only formed beneath the gate electrode.
6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
